

KELSI HENDERSON

Kelsi is graduating with a Bachelor of Science degree with a major in Computer Information Science. She plans to work at Blue Cross Blue Shield of Kansas, beginning after she completes her degree in May 2020. While Kelsi does not plan on pursuing a further degree, she plans to continue learning and developing her skills through self-taught research and through her profession as a future Application Developer. For her Capstone Project, Kelsi, along with two of her classmates, successfully created the basic functions and layout of a working phone application. Through this project, Kelsi developed essential skills such as team cooperation and communication, initiative, and creativity in solving problems. As Kelsi will likely be working with a team at BCBSKS, this experience has given her a foundation with which she can further develop and deepen these skills so she can serve her community better by developing applications at BCBSKS. Kelsi has made the Dean's List at her previous college (Neosho County Community College) as well as the President's Honor Roll at Washburn University every semester since enrolling as a full-time college student, at each respective College/University.
