### Overall Recommendations

Overall, continue with curriculum plan as developed. Changes to incorporate include participation in Team STEPPS to improve interprofessional opportunities for students and utilizing AFWC to improve response rate of employer survey.

### Overall Reflection

No text specified

### Faculty Collaboration

Faculty members collaborate at monthly staff meetings formally, and informally on a weekly basis to make improvements to curriculum and improve student learning. Faculty members collaborate on the collection and review of assessment data.

### Communication & Collaboration with Students

Students are involved in collaboration process in several ways. Students elect fellow students to sit on and

participate in the advisory board. Students also provide feedback via the formal course evaluation forms. Students also provide feedback informally via discussions related to program development and assessment practices.

### **Communication & Collaboration with External Stakeholders**

Advisory boards meet 2x per year to reflect upon program development and status. Student feedback is gathered informally via discussion and formally via the student course evaluation, completed at the conclusion of each course. Feedback from both of these stakeholders is reviewed and taken into consideration when reflecting upon assessment practices. Employers are involved upon completion of the employer survey, which is distributed and reviewed annually.

### **Communication & Collaboration with University**

Faculty are encouraged to participate in various CTEL events, including courses related to assessment practices, which is reflected on their faculty development plans.
