Washburn University prohibits discrimination on the basis of race, color, sex, religion, age, national origin, ancestry, disability, marital or parental status, sexual orientation/gender identity, genetic information, or other non-merit reasons, in University programs and activities, and employment, as required by applicable laws and regulations. The following person has been designated to handle inquiries regarding the non-discrimination policies: Dr. Pamela Foster, Equal Opportunity Director, Washburn University, 1700 SW College Ave, Topeka, Kansas, 66621, 785.670.1509, eodirector@washburn.edu

Contributing Writer - Alicia Moulden, School of Applied Studies

Gary Bayens Recognized for His Service as Associate Dean

Dr. Gary Bayens began serving as Associate Dean for the Washburn University School of Applied Studies (SAS) in July 2014. He has decided to step down from this position effective June 30, 2019, but will continue on at Washburn University; more on that below.

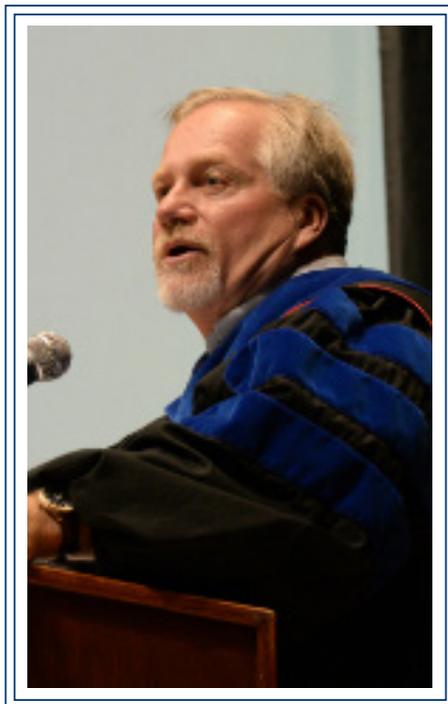

In his current role, Gary is an outstanding Associate Dean. He serves as a consultant and supporter for me personally and for the entire SAS School. The leadership and knowledge that he brings to the office from serving 10 years as chairperson of the Washburn University Criminal Justice & Legal Studies department is extremely beneficial in his role as associate dean.

Gary is also respected by faculty and staff as shown by these comments.

- Communication skills are excellent
- Strong leadership skills
- Is always professional and offers appropriate recommendations
- Is very knowledgeable about Washburn policies
- Understands specific needs of SAS
- He is fair and thoughtful in all of his decisions
- Strengths would be: high level of intelligence; works hard; good judgment; a fair minded person who respects differences of opinions, and seeks consensus wherever possible.

Gary will continue on with Washburn University, teaching in the spring 2020 semester. This after he completes an academic sabbatical in fall 2019. I am happy to recognize Gary Bayens and his service in SAS as he transitions from SAS Associate Dean to his future roles in SAS. We are fortunate to have him!

--Dr. Pat Munzer, Dean

Shelley Bearman joined the School of Applied Studies staff in January 2019 as an academic advisor. She has been an adjunct instructor at WU for 9 years, primarily teaching the Washburn Experience WU101 course. She also served for 3 years as the WU Sexual Assault Education and Prevention Project Coordinator. Shelley holds a Master of Science in Organizational Communication degree from Murray State University.

Welcome New Faculty

2018/2019 Academic Year

Allied Health

Dr. Craig Haugsness joined the Allied Health department as the Technology Administration Program Coordinator. He received a BSE in English and a Masters of Library Science degree at Emporia State University. He earned a Ph.D. in curriculum and instruction with a focus on computer-based instruction at Kansas State University.

Janelle Johnson joined the Allied Health department as the Bachelor of Health Science Program Coordinator. She earned a Master of Science degree in food and nutrition/dietetics from North Dakota State University-Fargo and a Masters in Business Administration degree from the University of Mary in Bismarck, North Dakota.

Amanda "Mandy" Lisher joined the Allied Health department as a Lecturer for the Bachelor of Health Science program. She earned a Masters degree in Medical Dosimetry from the University of Wisconsin-LaCrosse and holds a Bachelor of Health Science, an Associate of Science in Radiologic Technology and a Certificate in Radiation Therapy from Washburn University.

Dr. Kathy Tilley joined the Allied Health department as a Lecturer and Interim Director of the Occupational Therapy Assistant (OTA) program. She received a Bachelor of Science from Emporia State University. She earned a Master of Science in Microbiology and a Ph.D. in Grain Science (Cereal Chemistry) from Kansas State University. She also received an Associate of Applied Science degree in OTA from Brown Mackie College (BMC) in Salina.

Criminal Justice & Legal Studies

Dr. Hyoungah "David" Park joined the Criminal Justice & Legal Studies department as an Assistant Professor. He majored in law in the Korean National Police University, earned his MA in Public Administration from Yonsei University in Korea, and his Ph.D. in Criminal Justice at Rutgers University in New Jersey.

Human Services

Meghan Tuttle joined the Human Services department as Clinical Coordinator and Lecturer. She has a Bachelors degree in Social Sciences with a Psychology emphasis from Kansas State University and a Masters degree in Family Therapy from Friends University. She is a Licensed Clinical Marriage and Family Therapist and a Licensed Master Addiction Counselor.

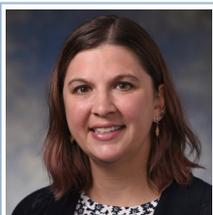

Dr. Zenova Williams joined the Human Services department as an Assistant Professor. She earned her Bachelor of Science in Psychology from Jackson State University, a Master of Science in Marriage and Family Therapy from the University of Southern Mississippi and is currently pursuing a Ph.D. in Marriage and Family Therapy from Kansas State University. She holds a certificate in Medical Family Therapy.

Social Work

Mallory Keeffe joined the Social Work department as Practicum Coordinator and Lecturer. She holds a Master of Social Work degree from Washburn University. She is a Licensed Specialist Clinical Social Worker (LCSW) and a Registered Play Therapist (RPT).

Dr. Beth O'Neill joined the Social Work department as an Assistant Professor. She earned a Bachelor of Social Work and a minor in Women's Studies from Nebraska Wesleyan University, a Master of Social Work from University of Missouri-Kansas City, and a Ph.D. in Social Work from the University of Kansas.

Barbara Owens has returned to Washburn as a Distinguished Visiting Lecturer in the Social Work Department. She holds a Bachelor degree in Social Sciences and Master of Social Work degree from Kansas State University. Barbara recently retired from clinical practice after a 30-year career in the social work profession. In her academic career, Barbara has served as both instructor and clinical supervisor for Washburn University and the University of Kansas.

Dr. Scott Sainato joined the Social Work department as an Assistant Professor. He earned his Ph.D. from the University of Texas at Arlington. He received a Master of Social Work from Texas A & M—Commerce University.

Visit to the White House

Taylor Jackson will be graduating with a Certificate in Diagnostic Medical Sonography (DMS) summer 2019. She completed a Bachelor in Political Science from the University of Vermont in 2010. She had always known she wanted to come back to school and after reading Dr. Ben Carson's book "Gifted Hands" she was inspired to pursue the medical field. She had an interest in ultrasound and was looking for a one-year program when a coworker told her about Washburn's one-year DMS program. She has been very pleased with the DMS program and faculty.

Recently, Taylor was selected to attend the Young Black Leadership Summit after she submitted an application with an essay in which she wrote about various black Republicans who have been inspirational to her, especially Ben Carson who would be speaking at the Summit. Taylor said, "Visiting the White House was absolutely amazing! Ben Carson talked about his journey growing up in poverty and struggling in school to becoming the director of pediatric neurosurgery at John Hopkins Hospital at age 33. He talked about negative

influences on the black community and poor role models for kids growing up in the inner city. He stressed the importance of early education as the key to success. After Dr. Carson spoke, President Trump came to the podium and addressed the crowd. We were all in awe that he took the time to invite us all to the White House and speak on the influence of black conservatives in America."

Taylor is completing her clinicals at the University of Vermont Medical Center. Her advice for future students; "Ultrasound is a great career and I would encourage anyone to shadow a department and see what they think. I would also say you should have a passion for radiology and a personality that can deliver a great bedside manner. Patient care is very important. An interest in physics is also great since there is a lot of physics involved when learning ultrasound. You will always be learning something new if you choose a career in ultrasound, as there are always new advancements."

Retiring Faculty

Join us in wishing Vickie Kelly, Ed.D. all the best as she begins phased retirement from the Allied Health Department, School of Applied Studies on July 1, 2019. Vickie began in September 2004 serving as the Director of the Kansas Career and Technical Education Resource Center, as well as teaching as an adjunct in the Bachelor of Health Science program. Vickie began teaching full-time in Fall 2008 serving as program coordinator for the Bachelor of Applied Science in Technology Administration. In 2012 she was instrumental in the development of the Master of Health Science program in Health Care Education. She began teaching fulltime in that program in January 2013. Vickie has also served since 2015 as the University Assessment coordinator and served on the HLC assurance argument writing/evidence linking team.

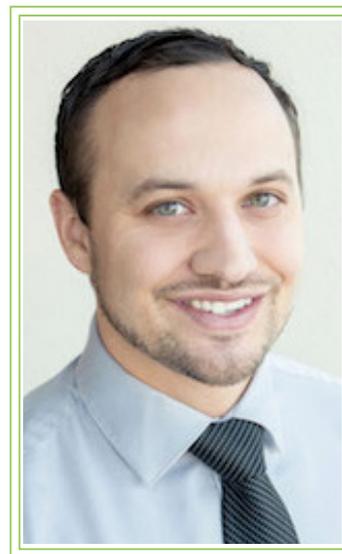

“Every Experience Matters”

Alumni Quentin Moore earned the Bachelor of Health Science (BHS) degree in Medical Imaging in 2010 and completed a Certificate in Radiation Therapy in 2009 here at Washburn University. He was a Sibberson Award finalist for the School of Applied Studies. He also earned a Master of Public Health degree which is offered jointly from Bowling Green State University and the University of Toledo in 2012, and an Associate of Science in Radiologic Technology from Mercy College of Northwest Ohio in 2008. Moore is currently the Program Director of Imaging Sciences and Program Director of the Bachelor of Health Science in Medical Imaging programs at Mercy College of Ohio.

He completed his clinicals at Blanchard Valley Health System which was the beginning of a successful future for him. “Washburn helped me enter the workforce, without the school and program, I would not be where I am at today. I was very fortunate to secure my first professional role with Schneider & Wuest, Inc. as a Medical Dosimetrist as a direct result of my clinical placement at Blanchard Valley Health System,” said Moore. He also credits his first teaching role at Mercy College as an Adjunct instructor in Radiation Therapy to his enrollment status in the BHS program.

Moore’s professional credentials include an American Registry of Radiologic Technologists (AART), Certification in Radiography (R), Radiation Therapy (T), and Quality Management (QM). He has been involved in numerous academic and institutional committees, professional service, and professional organizations. His professional honors include the ASRT Ballinger Educational Grant, ASRT’s Radiologic Technology Distinguished Author Award (Widger Award) in 2017, Mercy College “Core Values: Excellence” Award in 2017, the Award of Appreciation from Image Gently in 2012, and Educator of the Year Award from Northwest Ohio Imaging Professionals in 2012. Moore has also given numerous presentations and has written several publications.

His advice for future students; “I am a believer that every experience matters and I am hopeful that students in the program recognize and appreciate the opportunity that they have to advance their careers while changing the lives of those they serve.” Moore is currently a Ph.D. candidate in Health Science at Northern Illinois University.

Kudos

- The Occupational Therapy Assistant program was awarded continuing accreditation for another 7 years with the American Occupational Therapy Association, Inc. (AOTA).
- The Radiation Therapy program passed accreditation and are accredited for 8 years with the Joint Review Committee on Education in Radiologic Technology (JRCERT).

“The Best Fit For You”

Hannah Hagedorn is a Senior who will be graduating this summer with two degrees: a Bachelor of Criminal Justice with an emphasis in Forensic Investigations and a Bachelor of Arts in Psychology. She has been very involved on campus including the Leadership Institute, Peer educator in Mabee Library in the Prior Learning and Testing Office, Residential Advisor, Criminal Justice Association, Kansas Correctional Association, and helped start the Forensics Science Club. Her internship was not in Forensics, as her focus changed when she realized that Corrections was closer to what she wanted to do in criminal justice after a study abroad trip to Scotland. On this trip she learned about Scotland’s rehabilitative programs for inmates. She developed a strong passion for helping others

and hopes to be part of making these programs work more efficiently in America. She interned at Shawnee County Department of Corrections in their programming and re-entry department, where she facilitated classes for the female inmates. The curriculum includes Money Matters, which teaches foundational skills about money management, budgeting, and bills. Another class called Decision Points, is a cognitive psychology program built on changing thought processes. Inmates learn to take a risky behavior and look at it in a different way, to make decisions, and also to think a full thought before reacting. She was also involved in mediation training here at Washburn which helped her to learn the legal side of criminal justice and the basics of mediation in conflict resolution.

Hagedorn’s advice to future students: “Volunteer and take all of the extra classes that you can. I was dead set on Forensic Investigations until I took Serial Killers which taught about the interactions with people and I realized I wanted to focus on the people side of things. Be open minded; the career you came in wanting may not be what you end up doing. Take internships early; these opportunities help you understand what is the best fit for you after school.” She would like to start her future career in programming and re-entry or case management, while learning more about justice reform. She hopes that one day all inmates would go into some type of re-entry program because they offer valuable skills and lessons that they may have missed out on before they were inmates.

SAS Alumni Fellow

Kimberly Rieger was recently honored as the School of Applied Studies Alumni Fellow. An Alumni Fellow is a Washburn alumni who has distinguished themselves in their career. Each year in the fall, the Washburn University Alumni Association recognizes alumni from each academic unit with this honor. Rieger received a Master of Criminal Justice (MCJ) with an emphasis in Corrections Administration from Washburn University and a Bachelor of Arts in Political Science with a minor in Criminology from the University of Oklahoma. Rieger currently serves as the Chief United States Probation Officer for the District of Maine. She also serves the Federal Courts as a national trainer and subject matter expert, and has received commendation from the Administrative Office of the U.S. Courts for her work with their agency.

Rieger began her career with the United States District Court for the District of Kansas in 1999. After serving the District of Kansas, she moved to the Western District of Oklahoma where she was named the Deputy Chief United States Probation Officer for the Western District of Oklahoma. During her years in Oklahoma she served on the Board of Directors of New View Oklahoma, an agency serving the visually impaired, and the Board of Directors for the Oklahoma Women's Coalition. Rieger also served as the alumnae advisor for Delta Gamma at the University of Oklahoma from 2010-2014, where she was honored as the Outstanding Panhellenic Advisor. She was president of the Norman Delta Gamma Alumnae Chapter and in 2016 was honored as the Oklahoma City Panhellenic Association's Woman of the Year. Rieger is a graduate of the Norman, Oklahoma Chamber of Commerce Leadership program and the Federal Judicial Center's Leadership Development program.

She has taught as an adjunct instructor at Washburn for the Criminal Justice and Legal Studies Department. Rieger was featured as a criminal justice professional in the textbook Probation, Parole and Community Based Corrections. She credits the MCJ program for contributing to her successful career. "An advanced degree is crucial to compete for federal law enforcement positions and advancement within your agency. The graduate degree that I earned at Washburn has been instrumental in advancing my career. I would not be where I am today without my master's degree," Rieger said.

“Count it All as Joy”

Jacquetta (Nikki) Ramirez-Jennings graduated this spring with a Bachelor of Applied Science in Human Services with an emphasis in Integrative Practice. She had always known she wanted a career that gave her the opportunity to build relationships, advocate for those in need, and serve the Topeka community. The Human Services program fit her need to gather, love, lead, and launch others, especially those who are marginalized and oppressed. Ramirez-Jennings is a non-traditional student but always felt that Washburn was the right fit from day one. The availability of online and evening classes allowed her to work and provide for her young family. She said, “All of the classes I had throughout my academic career with Washburn have been fun and engaging! I recall

always looking forward to the discussions with my instructors and peers in my seated classes and online. I knew my opportunity was a privilege and while I did enjoy the journey, I also took it very seriously. One of my favorite memories of Washburn will be the friendships made, the knowledge obtained, and knowing that my instructors genuinely wanted me to be successful.”

She completed an internship with Topeka Public Schools at Eisenhower Middle School. At this internship, she learned about functioning with a mindset of the pronoun narrative of “we”. The idea behind this mindset is to approach life with others and not just for others which allows everyone to win. She currently serves as Club Director with the Boys & Girls Club of Topeka - Adams Unit. She has been enjoying her time there and the opportunity it provides to build relationships and make a difference and an impact on the Club members, their families, staff, and the Topeka Community. Her advice for current students: “Count it ALL as joy, love people where they are at, and always take time for self-care.”

“Step Out of Your Comfort Zone”

Alumni Chelsie Wilson graduated in fall 2018 with a Bachelor of Applied Science in Human Services with an emphasis in Integrative Practice. She also completed Certificates in Non-Profit Management and Trauma & Recovery Services. She was a member of Phi Kappa Phi Honors Society and a Sibberson Award finalist for the School of Applied Studies. Although Wilson’s parents are Washburn alumni, her decision to come here was based on small class sizes and “It was a school that truly cared about the success of each student, encouraged students to get involved, created connections with peers, and helped explore their interests. It truly felt like a place to call home,” she said.

During her time in the Human Services program, Wilson completed two internships at the Topeka Rescue Mission: in the Children’s Palace, and in the Doxazo Ministries department, and a third internship at Kansas Children’s Service League in the Post-Adoption Resource Center. Wilson credits her education for her first full-time position. The Topeka Rescue Mission offered her a position as a Classroom Assistant in the Children’s Palace. “The Children’s Palace is an early childhood education center for children whose families currently or formerly reside at the Topeka Rescue Mission Homeless Shelter. A unique aspect of the Children’s Palace is that we operate from a trauma-informed approach known as Trust-Based Relational Intervention (TBRI). Due to the history of trauma many of the children have experienced, TBRI is implemented into every facet of our program,” said Wilson. She believes her education prepared her for this position by offering classes on the effects of trauma on the brain, symptoms of trauma, and various other trauma-related topics.

Wilson’s advice for future students: “Take advantage of the opportunity to explore your interests and step out of your comfort zone. Although internships can require a lot of energy and time, they will benefit you tremendously if you are intentional in your role. Going above and beyond with the tasks you are given, seeking out constructive criticism from supervisors, and being teachable will help you walk away with valuable experiences and connections that you can use going forward in your education and career.”

“Develop My Voice”

Molly Manske is a Senior in the Bachelor of Social Work (BSW) program. She chose to attend Washburn because she knew her voice would be heard, she wanted to have strong relationships with the professors, and wanted to get to know all the other students in her major. Her father was a former criminal justice professor at Washburn and he raved about the education that is provided to students. After coming to campus, Manske was impressed by how easy it was to get involved in campus activities. She decided to jump right in as a member of the Delta Gamma sorority and has held a leadership position all three years. She is also involved in Young Life, Spanish club, and Bod squad. “By getting involved early on at Washburn, I was able to develop my voice and leadership

that has aided my success as a Social Work student and individual as a whole. I apply my Social Work knowledge in all aspects of my life, including my leadership in other organizations. I believe by getting involved at your university, it makes you a more educated and well-rounded student and individual,” said Manske.

Her future career goals involve working as an international social worker who advocates for children’s rights. She loves to travel and is minoring in Spanish as a way to enhance her communication skills. Manske participated in the recent study abroad trip to Colombia in fall 2018. This trip allowed her to see how social work knowledge from the United States applies to situations all around the world. Her advice for future students: “Be proud of your major. Not everyone has what it takes to be a social worker. Social Work is an incredible field to study and provides students with knowledge that goes beyond Social Work in general and focuses on developing students into culturally competent individuals. Social Work changes lives every day and continuously works for change in our society that benefits the overall lives of people who need it most.” After she completes the BSW, Manske plans to continue her education in the Master of Social Work (MSW) program.

Kudos

- The Social Work Program was awarded continuing accreditation for another 8 years with the Council on Social Work Education (CSWE).

“Truly Dedicate Yourself”

Maria Wellman graduated this spring with a Bachelor of Social Work (BSW). She was President of the BSW Student group and a member of the Phi Alpha Honor Society. Wellman chose social work as a major after meeting with the acting program manager for the Transitional Care Management (TCM) Program at the Topeka VA. The idea of linking those in need with resources for transition, whether it be through a traumatic event or another life altering occurrence, really resonated with her as something she could succeed at doing. She was able to apply this to her practicum at Douglas County Correctional Facility. During the fall, she attended the study abroad trip to Colombia. Wellman discussed what she learned during that trip: “I was exposed to a variance in all aspects; culture, language, politics, environment cuisine, and conflict. We attended talks with university professors and survivors of the trauma that accompanies the armed conflict in the region. This conflict surrounds the restitution of lands that had been taken by paramilitary groups during past events and continues to pose violent outcomes in returning these lands to their original owners. Some members of the community were hopeful for change, while others were distrustful of the government after all of the violence that was allowed.”

“Sembrandopaz, the host agency, is a very trusted agency by many in the community and other surrounding areas. Their employees and volunteers encourage and teach others to be self-sustaining and they host a number of different support groups for those affected by the violence. I was astounded that an entire population so accustomed to the violence they experienced could be so welcoming and attentive to “outsiders”. Though many had lost family, their homes, or both, they wanted to share their stories with us,” Wellman said.

Her advice to future students: “Truly dedicate yourselves to what you are doing. One of the challenges I have run into in my practicum year is that I became overwhelmed, taking away from my practicum experience. If I were to do it again, I would give my practicum its own academic year so that I could really apply myself to that environment.” Wellman hopes to continue working in correctional facilities and bring the experiences she learned in her practicum to encourage re-entry and programming case management services to facilities that do not already have them.

“Get Involved!”

D'Mya Valdivia graduated from Washburn Tech's Early Childhood Education certificate program in 2016 and from Shawnee Heights High School in 2017. She decided to pursue the Early Childhood Education certificate program because she loves children. She didn't plan to be teaching and making lesson plans but that is what the program involves and she ended up liking it. She still uses her certificate at her current job at the University Child Development daycare. The

program at WUTech helped her succeed at this job by teaching her how to create lesson plans and execute what was planned.

She choose to continue her education at Washburn as she is from Topeka and wanted to live at home. Another reason was the discounted tuition rate to complete an Associate degree through a program the School of Applied Studies offers to WUTech students. Valdivia found out about this program from Mitch Higgs at SAS. “Transferring from WUTech to Washburn was fairly easy and Mitch was very helpful so I was not blindsided by anything,” she said.

Valdivia completed an Associate of Arts in Human Services in fall 2019 and is now pursuing a Bachelors degree. She has taken full advantage of the opportunities that Washburn has available to be involved on campus. She is a member of the Black Student Union, a Student Ambassador, a Peer Educator, a Summer Orientation Counselor (SOC), and a Linc Bonner Scholar. Her advice to current students: “Get involved! All I have done on campus has allowed me to learn a lot about myself and others. I think it definitely enhances your education and when else are you going to have the time to do these kind of activities once you get out into the real world? Also, Washburn is a community that wants to help you and they want you to succeed so if you need help don't be afraid to reach out to someone and they can get you to the right place.” She is still early in her college career and is debating her numerous options for the future including continuing her education past a Bachelors degree.

Did You Know?

The School of Applied Studies (SAS) and Washburn Institute of Technology offers coursework which leads to the completion of an associate degree.

Eligibility/Requirements

- Students must be concurrently enrolled in 12 hrs at WUTech or have already completed one of the approved certificate programs. (See page 16)
- Reduced tuition only applies to associate degree requirements.
- Must start WU within 6 years of WUTech certificate completion.
- 15 credit hours of the required credit hours must be taken at Washburn University to complete Residency Requirements.
- Apply to Washburn University
- Meet with a School of Applied Studies advisor to determine your academic plan.

Donor Honor Roll

The School of Applied Studies extends thanks to the donors whose generous gifts were received between July 1, 2017 and June 30, 2018. The new donor list will be available after July 2019. The generosity of SAS alumni, faculty and friends help to maintain the excellence in education for which Washburn has become known.
