

Relaxation Techniques That Zap Stress Fast

1. Meditate

A few minutes of practice per day can help ease anxiety. It's simple. Sit up straight with both feet on the floor. Close your eyes. Focus your attention on reciting -- out loud or silently -- a positive mantra such as "I feel at peace" or "I love myself." Place one hand on your belly to sync the mantra with your breaths. Let any distracting thoughts float by like clouds.

2. Breathe Deeply

Take a 5-minute break and focus on your breathing. Sit up straight, eyes closed, with a hand on your belly. Slowly inhale through your nose, feeling the breath start in your abdomen and work its way to the top of your head. Reverse the process as you exhale through your mouth.

3. Be Present - Slow down

Notice how the air feels on your face when you're walking and how your feet feel hitting the ground. Enjoy the texture and taste of each bite of food. When you spend time in the moment and focus on your senses, you should feel less tense.

4. Reach Out

Your social network is one of your best tools for handling stress. Talk to others -- preferably face to face, or at least on the phone. Share what's going on. You can get a fresh perspective while keeping your connection strong.

5. Tune In to Your Body

Mentally scan your body to get a sense of how stress affects it each day. Lie on your back, or sit with your feet on the floor. Start at your toes and work your way up to your scalp, noticing how your body feels. Simply be aware of places you feel tight or loose without trying to change anything. For 1 to 2 minutes, imagine each deep breath flowing to that body part. Repeat this process as you move your focus up your body, paying close attention to sensations you feel in each body part.

6. Decompress

Place a warm heat wrap around your neck and shoulders for 10 minutes. Close your eyes and relax your face, neck, upper chest, and back muscles. Remove the wrap, and use a tennis ball or foam roller to massage away tension.
