

NOTICE TO ALL EMPLOYEES AND PUBLIC NOTICE OF INTENT TO FILE APPLICATION FOR
PERMANENT ALIEN EMPLOYMENT CERTIFICATION

Pursuant to Section 20 CRF 656.10, you are hereby notified that an application for permanent alien certification has been filed for the following position:

Senior VMWare and Systems Administrators Job ID #12389 in Topeka, Kansas
\$57,325/yr. - \$69,990/yr.

DUTIES: Builds, deploys, maintains, and assists with repairs of Windows and VMWare servers/hosts on racks, blades, and hyper-converged infrastructures, using VMWare and HyperV; Linux operating system management; and programming or scripting languages, such as PowerShell for automating tasks. Assigns lower level tasks and oversees the VMWare and Systems Administrator. Provides operational support and system administration of server hardware/OS that includes coordinating server hardware/OS repair with vendors, storage migrations, refresh of server OS/hardware, updating firmware/drivers, server decommissions, patching, implementing/supporting complex/high availability systems, assist with disaster recovery, and software deployments. Troubleshoots and collaborates with internal and external teams to resolve server infrastructure-related issues. Develops and maintains documentation on server infrastructure, software systems' components, and disaster recovery methodology. Ensures server backups are running regularly, addressing backup failures, and restores files as needed. Recommends changes to improve hardware platforms, operating systems, and associated Enterprise technologies and products. Researches new technologies by attending seminars, reading trade articles, or taking classes, to implement or endorse the implementation of new technologies. Participates in special projects and a 24x7 on-call rotation as assigned. Performs additional job-related duties as assigned or as appropriate.

MIN. REQS: Bachelor's degree (or equivalent) in Information Technology or related field. Two years of experience with VMWare and HyperV. Demonstrated ability with Linux operating system management. Demonstrated ability with programming or scripting language, such as PowerShell for automating tasks.

Must have proof of legal authority to work in the United States.
